THIS IS UNEVALUATED INFORMATION

- Pharmacopoeias used regularly in Czechoslovakia 25X1 Pharmacopoela, which was used by pharmacists in Slovakia, and the Austrian Pharmacopoeia, used in Bohemia and Moravia. A new post-WW II Pharmacopoeia could 25X1 be obtained from the Health Ministry, but it was not used to any extent.
 - A physicians' handbook, the Vademecum Slovenskeho Lekara, was published in 1943 by the Bratislava Medical Board (Lekarska komorá V Bratislava). The chief editors were Prof Frantisek Subik, (M,D. (myself) and Prof E Prikazsky , M.D.; the technical editors were K Holoman, M.D. (internal medicine) and I Secansky, M.D. (nutrition). A second edition of this handbook was published in 1950. Each year the Slovak medical authorities published a desk calendar and medical information to supplement the large handbook. A new edition of the handbook was published at intervals of approximately seven years. Both handbook and yearly calendar were distributed free to members of the Slovak medical organization.
 - There were two monthly publications available to Slovak physicians. One, the Slovensky Lekar, was designed for the use of general practitioners. The second, th Bratislavske Lekarske Listy, was for specialists and researchers; abstracts of the articles were printed in foreign languages. Prior to the end of World WarcII, this journal published abstracts of its articles in French, English and German. Since WW II, the abstracts have been in Russian, English and German only.

- 4. Foreign publications of all types were extremely scarce.
 Written communication between Slovak scientists and scientists in other Satellites was very difficult and very dangerous because of the interpretation which might be put upon it by censoring authorities.
- 25X1 5. A Soviet author, Batkis (fnu), recently wrote a book on the public health program of the USSR; it was translated into Czech and Hungarian and a copy of the book, in Czech, in Trnava
